Subject: Response to FMC Comments on the RD Work Plan and issues from today's call

Categories: 11-19 to 1-10 2014

Here are today's updates:

1) Comments to FMC comments on the RD Work Plan have gone out. I punted on two issues.

I still think that we may want to do post excavation gamma rather than just soil sampling in the Excavation area of the property. My response puts off the decision to the performance standards verification plan, which gives us lots of time to think about it.

IDEQ comment on infiltration vs. runoff. I quick call with FMC will resolve the issue, and so I did not write a sentence for them to add.

2) Issues from today's call.

Comments on the Gamma Cap study are due January 6 rather than December 17th. I am in meetings most of next week and would not have the opportunity to process them. EPA has some problems with the results off the study.

Bernie is going to speak to Rob about our responses to FMC comments. We came up with the strategy for sampling wells for a "complete" analyte list, which I will be sending out later today.

Our call scheduled for 12/26 is cancelled.

Happy Holidays.

Kevin
